Proto Resources & Investments Ltd

MANAGING DIRECTOR'S LETTER

24 July 2013

Dear Shareholder,

On behalf of Proto Resources & Investments Limited I wish to thank shareholders for their continued support, despite challenging global commodity and equity markets, as we continue to pursue our Australian project development strategy.

This Prospectus offers Shareholders the opportunity to participate on a pro-rata basis to accept their entitlements and will reduce dilution of their existing shareholding. The board deemed this method as the best way of raising funds and rewarding its existing shareholders. The offer does not impact on the Company's ability to raise funds under ASX Listing Rule 7.1. The Company is keen to provide all shareholders with an opportunity to invest in order to facilitate investment as much as possible from current Proto shareholders.

Proto's Lindemans Bore Project in the Northern Territory is a significant part of this strategy and the Company is currently awaiting laboratory assays from the recently completed fourth diamond drill hole (LBD4).

As announced to the market on 12 June 2013, the Company is also pleased with the recent exploration success including the discovery of nickel and copper sulphide mineralisation through a drilling program and the identification of 7 Versa-tile Time Domain Electromagnetic Survey ("VTEM") anomalies which provide highly prospective targets for follow up work.

Proto expects to see a new drilling campaign on the Clara Hills Project with Victory Mines Limited ("VIC") over the coming months to follow up this exploration discovery.

Added to these initiatives, Proto intends on restarting exploration drilling at the Mt Veters project in Western Australia where we are exploring for high grade nickel sulphide mineralisations similar to the Silver-Swan mineralisation which is within 2-3km's of Proto's project tenement area.

The Board is pleased to offer Shareholders the opportunity to participate in a pro-rata non-renounceable entitlement issue of New Shares on the basis of two New Shares for every three Shares held at the Record Date. An attaching New Option will be issued on the basis of one New Option for every New Share subscribed for under the Offer.

Each New Share will be issued at a total issue price of 0.1 cent (\$0.001) per New Share paid on acceptance of the Offer.

Each New Option is exercisable into ordinary Shares at 0.55 cents (\$0.0055) on or before 5.00pm (WST) on 26 March 2017. Please refer to Section 2.2 of this Prospectus for full terms of the New Options and the underlying Shares.

All Shareholders registered at 5.00pm (WST) on 22 July 2013, being the Record Date, will be entitled to participate in the pro-rata non-renounceable entitlement issue offered under this Prospectus.

The Closing Date for acceptances is 5.00pm (WST) on 12 August 2013.

Proto Resources & Investments Ltd

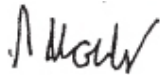

The Company has sought quotation of the New Shares and New Options on ASX on 11 July 2013.

The Board encourages all Shareholders take up their entitlements and advises that each of the Directors will fully take up their respective entitlements. Funds raised from the Offer will be used for working capital purposes and to pay the expenses of the Offer.

The Board takes this opportunity to thank all Shareholders for their support and looks forward to your continued support in the future.

Shareholders should refer to Section 3 – 'Risk Factors' when considering the information provided.

Yours faithfully

Andrew Mortimer
Managing Director

SECTION 2 RIGHTS AND LIABILITIES ATTACHING TO SECURITIES

2.1 Terms and Conditions of Ordinary Shares

The rights attaching to the Ordinary Shares are derived through a combination of statute, the Company's constitution, common law, the Listing Rules and other applicable legislation. The following is a broad summary (though not an exhaustive or definitive statement) of the current rights that attach to Ordinary Shares in the Company.

(a) **Voting Rights**

Subject to any rights or restrictions attached to any class of shares, whether by their issue, the Constitution, the Listing Rules or the Corporations Act, at a general meeting each Shareholder present in person or by proxy, company representative or attorney, is entitled to one vote on a show of hands. Upon a poll, every Shareholder present in person or by proxy, company representative or attorney, is entitled to one vote for each fully paid Ordinary Share that the Shareholder holds.

(b) **General Meetings**

Each Shareholder is entitled to receive notice of and to be present, to vote and to speak at a general meeting of the Company. Further, each Shareholder is entitled to receive all notices, accounts and other documents required to be furnished to Shareholders under the constitution of the Company, the Listing Rules or the Corporations Act.

(c) **Dividend Rights**

The Company may in general meeting declare a dividend which shall not exceed the amount recommended by Directors. The Company does not expect to pay dividends in the short to medium term.

(d) **Transfer of Shares**

Subject to the constitution of the Company, the Corporations Act, the ASX Settlement Operating Rules and the Listing Rules, Ordinary Shares are freely transferable. Ordinary Shares may be transferred as set out in the Constitution, including by way of a market transfer. The Company may decline to register a transfer (other than a market transfer) where permitted by law, the Listing Rules or the ASX Settlement Operating Rules.

(e) **Changes in Capital**

Subject to the Corporations Act, the constitution of the Company and the Listing Rules, the Directors may consolidate, or divide the Ordinary Shares, allot, issue or otherwise dispose of new Ordinary Shares on such terms and conditions as they determine.

(f) **Variation of Rights**

The Company may only modify or vary the rights attaching to any class of Ordinary Shares with the consent in writing of three quarters of the issued shares of that class or by a special resolution of the Company passed at a meeting of the holders of the issued Ordinary Shares of that class.

(g) **Rights on Winding Up**

If the Company is wound up, the liquidator may, with the authority of a special resolution of the Company, divide among the shareholders in kind the whole or any part of the property of the Company, and may for that purpose set such value as he considers fair upon any property to be so divided, and may determine how the division is to be carried out as between the shareholders or different classes of shareholders. The liquidator may, with the authority of a special resolution of the Company, vest the whole or any part of any such property in trustees upon such trusts for the benefit of the contributories as the liquidator thinks fit, but so that no shareholder is compelled to accept

Proto Resources & Investments Ltd

any shares or other securities in respect of which there is any liability. Where an order is made for the winding up of the Company or it is resolved by special resolution to wind up the Company, then on a distribution of assets to members, any shares classified as restricted securities at the time of the commencement of the winding up shall rank in priority after all other shares.

2.2 Terms and Conditions of New Options

The New Options are granted on the following terms and conditions:

- (a) Each New Option entitles the holder to acquire one fully paid Ordinary Share in the Company.
- (b) The New Options may be exercised at any time on or before 5.00pm (WST) on 26 March 2017. Each New Option may be exercised by forwarding to the Company at its principal office the exercise notice, duly completed, together with payment of the sum of 0.55 cents (\$0.0055) per New Option exercised. The New Options will lapse at 5.00pm (WST) on 26 March 2017.
- (c) The New Options may be transferred by an instrument (duly stamped where necessary) in the form commonly used for transfer of New Options at any time until 5.00pm (WST) on 26 March 2017, being the date the New Options expire. This right is subject to any restrictions on the transfer of a New Option that may be imposed by ASX or under applicable Australian securities law.
- (d) New Optionholders can only participate in new issues of securities provided they have first exercised their New Options in which case the New Optionholders shall be afforded the period of at least nine (9) business days prior to and inclusive of the record date (to determine entitlements to the issue) to exercise the New Options.
- (e) Ordinary Shares issued on the exercise of New Options will be issued not more than fourteen (14) days after receipt of a properly executed exercise notice and application moneys. Ordinary Shares allotted pursuant to the exercise of a New Option will rank equally with the then issued ordinary shares of the Company in all respects. If the Company is listed on ASX it will, pursuant to the exercise of an Option, apply to ASX for Quotation of the Ordinary Shares issued as a result of the exercise, in accordance with the Corporations Act and the Listing Rules.
- (f) In the event of any reconstruction (including consolidation, sub-division, reduction or return) of the issued capital of the Company, all rights of the option holder will be changed to the extent necessary to comply with the Listing Rules applying to the reconstruction of capital at the time of the reconstruction.
- (g) If there is a bonus issue to shareholders, the number of Ordinary Shares over which the New Option is exercisable may be increased by the number of Ordinary Shares which the holder of the New Option would have received if the New Option had been exercised before the record date for the bonus issue.
- (h) In the event that a pro rata issue (except a bonus issue) is made to the holders of the underlying securities in the Company, the exercise price of the Options may be reduced in accordance with Listing Rule 6.22.

SECTION 3 RISK FACTORS

3.1 Risks Associated with Investment

Prospective investors should be aware that the market price of the New Shares and attaching New Options following official quotation may be influenced by many unpredictable factors and that subscribing for New Shares and attaching New Options involves various risks. The value of the Company's securities on the ASX may rise and fall depending on a range of factors, some of which are beyond the control of the Company.

The Company is in its early development stage. Any profitability in the future from the Company's business will be dependent upon the successful development, production and marketing of nickel and other minerals from the Company's projects.

The New Shares and attaching New Options being offered under this Prospectus are considered speculative due to the present stage of development of the Company. This Prospectus carries no guarantee with respect to the return of capital or price at which the New Shares and attaching New Options or Shares resulting from the exercise of the New Shares and attaching New Options will trade.

The factors detailed below should be considered by any potential investors; however, this is by no means an exhaustive list of the risks that may affect the Company. Potential investors should examine the contents of this Prospectus in its entirety and the specific matters referred to in the Company's announcements and consult their professional advisors before deciding whether to apply for New Shares and attaching New Options.

3.2 Specific Risks

3.2.1 Potential for significant dilution

Upon implementation of the Offer, assuming all Entitlements are accepted and no Options are exercised prior to the Record Date the number of Shares in the Company will increase from 1,647,137,571 currently on issue to 2,745,229,285. This means that each Share will represent a significantly lower proportion of the ownership of the Company.

A dilution table is provided below showing the effect of acceptances on the number of ordinary shares as at the date of the Entitlements Issue assuming no shortfall placed;

	100% acceptance	75% acceptance	50% acceptance	25% acceptance
Shares on Issue	1,647,137,571	1,647,137,571	1,647,137,571	1,647,137,571
Entitlements Issue	1,098,091,714	823,568,786	549,045,857	274,522,929
Total	2,745,229,285	2,470,706,357	2,196,183,428	1,921,660,500
Dilution	66.67%	50.00%	33.33%	16.67%

It is not possible to predict what the value of the Company or a Share will be following the completion of the Offer being implemented and the Directors do not make any representation as to such matters.

3.2.2 Future Capital Needs and Inherent Uncertainty Regarding Concern

Further funding of projects may be required by the Company to support its ongoing activities and operations. There can be no assurance that such funding will be available

on satisfactory terms or at all. Any inability to obtain funding will adversely affect the business and financial condition of the Company and, consequently, its performance. A failure to meet cash calls would result in default in joint venture obligations which, if not remedied, could result in forfeiture of licences.

It is noted the Independent Auditor's Review Report on the half-year financial report to 31 December 2012 accounts contains an Emphasis of Matter in relation to the Company's ability to continue as a going concern.

3.2.3 Exploration Risk

The successful exploration and development of mineral properties is speculative. Most exploration projects do not result in the discovery of commercially viable deposits. The mineral tenements of the Company are at various stages of exploration. There can be no assurance that exploration of tenements held or acquired by the Company in the future, will result in the discovery of an economic deposit. Even if an apparently viable deposit is identified, there is no guarantee that it can be economically exploited into a producing mine.

The exploration costs of the Company are based on certain estimates and assumptions with respect to the method and timing of exploration. By their nature, these estimates and assumptions are subject to significant uncertainties and, accordingly, the actual costs may materially differ from these estimates and assumptions. Accordingly, no assurance can be given that the cost estimates and the underlying assumptions will be realised in practice, which may materially and adversely affect the Company's viability.

Compliance Risk

The Company has acquired an interest in various mining tenements including tenements in Tasmania, Western Australia, and the Northern Territory. Title to these tenements is subject to the Company, as tenement holder, complying with the terms and conditions of each tenement, including the minimum annual expenditure commitments. There is a risk that if the Company does not comply with the terms and conditions of each tenement, it may lose its interest in the relevant tenement.

The Company has implemented appropriate policies and practices to mitigate the risk that the terms and conditions attaching to each of the tenements it has acquired an interest in are not complied with.

3.3 General Risks

3.3.1 Share Market

Share market conditions may affect the value of the Company's quoted securities regardless of the Company's operating performance.

Share market conditions are affected by many factors including but not limited to the following:

- general economic outlook;
- interest rates and inflation rates;
- currency fluctuations;
- mineral price fluctuations;
- changes in investor sentiment toward particular market sectors;
- the demand for, and supply of, capital;
- terrorism or other hostilities; and
- other factors beyond the control of the Company.

3.3.2 Operating Risks

The operations of the Company may be affected by various factors, including failure to locate or identify deposits, failure to achieve predicted grades in exploration and mining,

operational and technical difficulties encountered in mining, difficulties in commissioning and operating plant and equipment, mechanical failure or plant breakdown, unanticipated metallurgical problems which may affect extraction costs, adverse weather conditions, industrial and environmental accidents, industrial disputes and unexpected shortages or increases in the costs of consumables, spare parts, plant and equipment.

3.3.3

3.3.3 Commercialisation Risks

Even if the Company discovers commercial quantities of minerals, there is a risk the Company will not achieve a commercial return. The Company may not be able to transport the minerals at a reasonable cost or may not be able to sell the minerals to customers at a rate which would cover its operating and capital costs. The Company has to receive regulatory and environmental approval to convert its exploration permits into production concessions. There is a risk that these approvals may not be obtained.

3.3.4 Economic and Government Risks

The future viability of the Company is also dependent on a number of other factors affecting performance of all industries and not just the exploration and mining industries including, but not limited to, the following:

- general economic conditions in Australia and its major trading partners;
- changes in Government policies, taxation and other laws;
- the strength of the equity and share markets in Australia and throughout the world, and in particular investor sentiment towards the commodities (resources) sector;
- movement in, or outlook on, interest rates and inflation rates; and
- natural disasters, social upheaval or war in Australia or overseas.

3.3.5 Commodity Price and Exchange Rate Risk

As the Company's potential earnings will be largely derived from the sale of mineral commodities, either in processed or concentrate forms, the Company's future revenues and cash flows will be impacted by changes in the prices of these commodities. Commodity prices fluctuate and are affected by numerous factors beyond the control of the Company. These factors include current and expected future supply and demand, forward selling by producers, production cost levels in major metal producing centres as well as macroeconomic conditions such as inflation and interest rates.

Furthermore, the international prices of most commodities are denominated in United States dollars while the Company's cost base will be in Australian dollars. Consequently changes in the Australian dollar exchange rate will impact on the earnings of the Company. The exchange rate is affected by numerous factors beyond the control of the Company, including interest rates, inflation and the general economic outlook.

SECTION 4 PURPOSE AND EFFECT OF THE OFFER

4.1 Purpose of the Offer and Use of Funds

Under the Offer, approximately 1,098,091,714 New Shares and 1,098,091,714 New Options are available for issue and will be issued if the Offer is fully subscribed (either by Shareholders accepting the offer under this Prospectus or pursuant to the allocation of any Shortfall referred to in Section 1.9 of this Prospectus).

After expenses of the Offer, the proceeds from the Offer of New Shares and attaching New Options will be approximately \$1,011,521 (assuming that the Offer is fully subscribed, none of the existing Options on issue are exercised and no further securities are issued). These funds, when received will firstly be allocated towards the general working capital of the Company to continue the ongoing funding of the Company. Funds from working capital could be used over the coming periods to finance the ongoing exploration works of the Company on its existing projects, the assessment of new opportunities to add to those existing projects and for meeting the Company's ongoing administrative and management costs.

The proceeds of the Offer will be used as follows (assuming full subscription):

	Use of Funds	Full Subscription (\$)
1.	Mooloogool Project	265,000
2.	Lindemans Bore Project	210,000
3.	Waterloo Project	105,000
4.	Western Australian Projects	105,000
5.	Barnes Hill Project	80,000
6.	Working capital	333,092
7.	Expenses of the Offer	86,571
	Total Proceeds	1,011,521

Should the offer not be fully subscribed, the use of funds table above would be scaled back proportionately to reflect the Entitlement Acceptance. Accordingly the Company may not be able to meet its objectives set out above. In this instance the Company may consider alternative methods of funding which would be determined by the board if required.

4.2 Effect of the Offer

Assuming full subscription and that none of the existing Options on issue are exercised, the principal effect of the Offer will be to:

- (a) increase cash reserves by approximately \$1,011,521 after deducting estimated expenses of the Offer;
- (b) increase the number of the Shares on issue by 1,098,091,714 following the completion of the offer; and
- (c) increase the number of Options on issue by 1,098,091,714 following completion of the Offer.

Please see Section 1.10 of this Prospectus for further details regarding the effect of the Offer on the Company's capital structure.

SECTION 5 ADDITIONAL INFORMATION

5.1 Nature of this Prospectus

This Prospectus is issued under the special prospectus content rules for continuously quoted securities in section 713 of the Corporations Act. This enables listed disclosing entities, such as the Company, to issue a prospectus for continuously quoted securities with modified disclosure requirements if they satisfy certain requirements.

The information in this Prospectus principally concerns the terms and conditions of the Offer and the information reasonably necessary to make an informed assessment of:

- the effect of the Offer on the Company; and
- the rights and liabilities attaching to the New Shares and attaching New Options offered by this Prospectus.

The Prospectus is intended to be read in conjunction with the publicly available information in relation to the Company which has been notified to ASX and does not include all of the information that would be included in a prospectus for an initial public offering of securities in an entity that is not already listed on a stock exchange. Shareholders should therefore also have regard to the other publicly available information in relation to the Company before making a decision whether or not to invest.

5.2 Continuous Reporting and Disclosure Obligations

The Company is listed on ASX and quoted with codes PRW (Shares) and PRWO and PRWOA (Options).

The Company is a “disclosing entity” for the purposes of the Corporations Act. As such, it is subject to regular reporting and disclosure obligations, which require it to disclose to ASX any information of which it is or becomes aware concerning the Company and which a reasonable person would expect to have a material effect on the price or value of securities of the Company.

Copies of documents lodged with ASIC in relation to the Company may be obtained from, or inspected at, an office of ASIC.

The Company will provide a copy of all documents used to notify ASX of information relating to the Company under the provisions of the Listing Rules since the lodgement of the Company’s Half Year Report on 18 March 2013 free of charge to any Shareholder who so requests prior to the Closing Date. A list of those documents for the period ended 18 March 2013 to the time of lodging this Prospectus is set out in Section 6.

The total maximum remuneration of non-executive Directors is initially set by the Constitution and subsequent variation is by ordinary resolution of Shareholders in general meeting in accordance with the Constitution, the Corporations Act and the ASX Listing Rules, as applicable. The determination of non-executive Directors' remuneration within that maximum will be made by the Board having regard to the inputs and value to the Company of the respective contributions by each non-executive Director.

A Director may be paid fees or other amounts (i.e. non-cash performance incentives such as Options, subject to any necessary Shareholder approval) as the other Directors determine where a Director performs special duties or otherwise performs services outside the scope of the ordinary duties of a Director.
